

Come Fly with Us

As the seventh grade team concludes their Geometry unit, we are excited to start on our final project. Your child's 7th grade math classes will be constructing a tetrahedron kite as an end of the school year activity. In order to construct your students kite, we need a little help with the cost of supplies. Your students Math teacher is seeking out \$1.00 from each student to help with the cost of supplies and in return your student will be able to keep their kite and share the experience with others.

Please fill out the information below and return to school by June 3th. Thank you.
